

About us

Visuelle Zeiten – Studio for Graphic Design and Film

///

Julia Pax and Ronald Scharf founded the studio in early 2009. We both are Graduate Designers with degrees from the University of Applied Sciences in Mainz, Germany.

We design high-quality print materials and time-based media applications. Our services comprise consulting as well as individual solutions in various fields of visual communication – from logo design to corporate videos.

We understand design as a precise translation of contents into a functional and an emotional form. Our designs reflect this through perfect style, a skillful application of techniques and meticulous realization with attention to detail. Coupled with the enthusiasm to look for inspiration off the beaten track, our work has won several important awards.
